New Double-Flowering White Anemone.

ANEMONE WHIRLWIND.

(*Anemone Japonica Alba, fl. pl.*)

It is with considerable pride that we announce to the *Floral World* that we are the disseminators of this superb and valuable novelty. Not often is such a rare and valuable acquisition added to our list of hardy herbaceous plants, and especially one which has so many valuable characteristics. Like the Anemone Alba, from which it is a sport, the blooming season is in the autumn; then it is that the great value of our Anemone Whirlwind becomes apparent, as all flowers are very scarce at this season, especially white flowers; therefore this variety will prove to be indispensable to florists on account of its wonderful adaptability for use in all floral and ornamental designs.

The flowers are about 2½ inches in diameter, pure snowy white, of good substance and very handsomely formed, having several rows of petals.

The plant makes a strong, healthy growth, is well covered with foliage, and in this variety has proved to be even more hardy than its parent; this we consider another great point in its favor.

Having by special effort grown an immense stock of this superb novelty, we are enabled to offer it at a price within the reach of all.

CHRYSANTHEMUMS.

We grow only the best Chrysanthemums, and our customers may feel assured that the following list is the CREAM for Cut-Flower and Exhibition purposes:

Clara Goodman. Large, Late Flowering Yellow. Honors are not easy to attain at the present time on account of the many introductions in this class of very popular plants, but when we introduced George S. Conover Chrysanthemum as the very best, large, early, flowering yellow, we scored a great success. We want more of the same kind of medicine, therefore, in introducing our new, large flowering, late variety, Clara Goodman, to our customers, they may rest assured that they will not receive an untried sort, which will have to be discarded after growing a year or two. We have grown it five years, and the past season it was even better than the first year it bloomed.

In making up your list of new Chrysanthemums, don't overlook the Clara Goodman, as we are confident this variety will give entire satisfaction and become a popular and standard sort. The flowers of this variety are about the size of Philadelpeia, full and double to the center, of a very bright, deep yellow, borne on erect, very stiff stems, which are well furnished with handsome, dark foliage. Five Wonderful Geraniums.

The Five New Geraniums we now Offer are the Most Distinct and Beautiful we have Ever Seen, and are Truly Wonderful.

MD. JAULIN.

Without question the finest new semi-double Geranium offered in many years. This is an entirely distinct color in the Bruant or bedding type. Very large florets compose a truss of grand size; center of flower very delicate pink bordered with pure white; for freshness and beauty this variety is unrivalled by any bedding sort, and is equally as valuable for pot culture and market purposes.

J. SALLIER.

A vigorous growing and remarkably free flowering variety. Trusses very large and of perfect form, composed of single flowers entirely distinct from any existing variety; edges of petals carmine lake, the center is washed in tints of rose and bluish Heliotrope color, the upper petals are veined carmine and marked with orange at the base. This is one of the most distinct and valuable Geraniums of the year, and we recommend it highly.

MD. BRUANT.

MD. BRUANT.

The Novelty of the Year.

A grand variety wholly distinct from any other in cultivation. White, veined with carmine lake, florets regularly bordered with bright solferino, the arrangement of color is exquisite, often intermingling and producing a striped effect; the trusses are large and beautifully formed; the plant is a good, healthy grower, and very free flowering. Everything considered this is the most distinct and wonderfully-colored variety ever sent out, and certainly the finest plant novelty of the year. Will sell on sight.

FLEUR POITEVINE.

Another very distinct colored variety. Large single flowers; color brilliant rosy carmine, marbled and striped with pure white, producing an aureole of deep orange carmine at the center; the plant is dwarf, but robust and wonderfully free flowering.

J. RICAUD.

A very fine free-flowering double variety, with enormous-sized trusses on strong foot-stalks; flowers purplish crimson of a very intense shade, center very distinctly marked white that shades beautifully into the other color. Should be in every collection.

New Branching Asters.

WHITE BRANCHING ASTER.

Since the introduction of the New White Branching Aster we have grown this variety very extensively for the cut-flower market. The past season our daily shipments were from 3,000 to 5,000 blooms, and as the demand has been steadily on the increase, we consider it sufficient evidence that the Branching Aster has already become a standard market flower. As a *money maker*, this Aster is far ahead of any other summer or autumn blooming plant. The flowers are very large, on long, stiff, well-foliaged stems, pure snowy-white, with gracefully-curved and twisted petals, forming a flower of great beauty and attractiveness, which can only be surpassed by the Chrysanthemum.

From the white branching variety we have, by careful selection, fixed two other colors, crimson and purple. They are of the same branching habit as the parent, with flowers equally as large and beautiful.

This class of Asters bloom considerably later than all other varieties, and at a season when there is the greatest scarcity of flowers, a feature which will be readily appreciated by those who have been caught short.

Give these New Branching Asters a trial and you will ever after have them in your collection.

The seed we offer has been specially grown for our trade, having been saved from the largest and most perfect flowers only.
